## DETAILED ACTION

### *Election/Restrictions*

The inventions are distinct, each from the other because of the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 39-43, 46 and 47-55, drawn to Fig. 1, classified in class 345, subclass 156.
- II. Claims 19-35, 39-43, 45 and 46, drawn to Fig. 12, classified in class 715, subclass 700.

Inventions of groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group I has separate utility such as a plurality of switches and a pressure member that does not necessitate the role of the first and second controls as recited by the claims in group II.

Similarly, the invention of group II has separate utility such as having a first and second control that does not necessitate the role of pressure member as recited by the claims in group I.

See MPEP § 806.05(d).
